At WorldGD, we understand the allure of bamboo - its natural beauty, strength, and versatility. With our synthetic bamboo, we've taken these qualities and enhanced them with advanced materials and technology. The result? A stunning range of products that mimic the look and feel of real bamboo but with added durability and longevity.

Keen to advocate for sustainable development, we offer an eco-conscious product lineup to meet present-day construction and developmental needs while safeguarding the ability of future generations to meet their own. We hold Quality Management Systems certifications, underscoring our commitment to quality assurance.

World GD utilizes industrial-grade, highly durable materials suitable for all climates, ensuring a lifespan of 50 years or more. Our products are engineered to provide a lasting solution to the pervasive issue of excessive natural resource depletion for exotic construction, thereby mitigating the adverse impacts of real estate development on the environment.

World GD

At all our facilities, product waste is diverted from final disposal and repurposed in other plastic manufacturing processes. Our shipping packaging, composed of World GD production remnants, is minimized to reduce environmental footprint.
